

2011-2012 Clinical Guidelines

Asthma Management Guidelines

National Asthma Education and Prevention Program Expert Panel Report 3: Guidelines for the Diagnosis and Management of Asthma - National Institutes of Health (NIH) – National Heart, Lung, and Blood Institute.

<http://www.nhlbi.nih.gov/guidelines/index.htm>

American Academy of Asthma, Allergy, and Immunology

<http://www.aaaai.org/>

Centers for Disease Control and Prevention

<http://www.cdc.gov/asthma/>

Asthma is a chronic inflammatory disorder of the airways. Although asthma cannot be cured, it can be controlled. Goals of Asthma Control Therapyⁱ:

- Minimal or no chronic symptoms day or night
- Minimal or no exacerbations
- No limitations on activities; no school/parent's work missed
- Maintain (near) normal pulmonary function {*Adults and Children Older Than 5 Years of Age*}
- Minimal use of short-acting inhaled beta₂-agonist (less than or equal to 2 days per week)
- Minimal or no adverse effects from medications.

Cholesterol / Coronary Artery Disease Guidelines

Third Report of the Expert Panel on Detection, Evaluation, and Treatment of High Blood Cholesterol in Adults (Adult Treatment Panel III) Full Report - U.S. Department of Health and Human Services. National Institutes of Health - National Heart, Lung and Blood Institute.

<http://www.nhlbi.nih.gov/guidelines/cholesterol/index.htm>

Risk Interventions to reduce the development of Coronary Artery Disease includeⁱⁱ:

- Cholesterol management of LDL-C <100 mg/dL for high risk patients
- Regular exercise 3-4 times a week for 30 minutes
- Achieve and maintain desirable weight
- Counsel patients to quit smoking
- Blood Pressure control goals as designated by JNC 7 Blood Pressure Classification

Please note: All hyperlinks are current as of 05/11 and are subject to change.

Diabetic Care Management Guidelines

American Diabetes Association, Clinical Practice Recommendations, 2011

http://care.diabetesjournals.org/content/34/Supplement_1/S4.extract

American Association of Clinical Endocrinologists Medical Guidelines for Clinical Practice for the Management of Diabetes Mellitus

<https://www.aace.com/publications/guidelines>

The physician should evaluate blood glucose control and disease complications. The patient with diabetes (type 1 or 2) should have the followingⁱⁱⁱ:

- An annual retinal eye exam.
- Glycemic control: The A1C goal *for patients in general* is an A1C goal of <7%. A Hemoglobin A1C (HbA1c) test two times a year if stable glycemic control; quarterly in patients whose therapy has changed or who are not meeting glycemic goals.
- An annual LDL-C screening performed, with a goal of <100mg/dl as the primary goal of therapy for adults. Very high-risk patients, LDL <70mg/dl.
- Nephropathy screening should be performed annually to test for the presence of microalbuminuria in type 1 diabetic patients with diabetes duration of ≥5 years and in all type 2 diabetic patients, starting at diagnosis and during pregnancy.

2011-2012 Clinical Guidelines (cont'd)

Hypertension Care Management Guidelines

The 7th Report of the Joint National Committee on Prevention, Detection and Evaluation and Treatment of High Blood Pressure (JNC 7 Express) - U.S. Department of Health and Human Services. National Institutes of Health - National Heart, Lung and Blood Institute.

<http://www.nhlbi.nih.gov/guidelines/index.htm>

The JNC7 complete report provides guidelines for hypertension prevention and management. In presenting these guidelines, the committee recognizes that the responsible physician's judgment remains paramount^{iv}.

- The risk of cardiovascular disease (CVD) beginning at 115/75 mmHg doubles with each increment of 20/10 mmHg
- Individuals who are normotensive at age 55 have a 90 percent lifetime risk for developing hypertension

AvMed measures and monitors members with blood pressure readings of less than 140mmHg/90mmHg
